

"Back to Back wells" at Horse Hill?

Our Next Steps

Surrey County Council have granted Horse Hill Dev Ltd (UK Oil & Gas) their planning application for their next stage of work at Horse Hill, Surrey

This production phase includes drilling 4 more wells (a total of 6, with a reinjection well which causes earthquakes elsewhere), gas flaring, significant noise and increased daily HGV movements for 25 years, **in an area prone to earthquakes.**

This will "significantly change the landscape" and have "an adverse effect upon valued landscapes".

Come and get updated on their plans and how this could affect your health, your community and your property

AND FIND OUT HOW THIS CAN STILL BE STOPPED!!

**Where: Catholic Church Hall, 4 Vicarage Ln,
Horley RH6 8AR**

When: Wednesday 25 September, 8.00pm

"This type of oil deposit very much depends on being able to drill your wells almost back to back so it becomes very much like an industrialised process..."

Stephen Sanderson, Chairman of Horse Hill Developments Ltd, speaking in 2016
